What sets us apart at TaylorCraft Cabinet Door Company?

Since 1971 our founders have built and maintained a solid reputation in the cabinet industry for quality products and dependable value. We know the cabinet industry well and understand the importance of partnering with reliable suppliers to build a strong customer base and an excellent referral network.

TaylorCraft is 100% committed to providing Quality of Product, Quality of Service and Quality of Delivery. As you look through our door catalog you will find ways we honor this commitment and set ourselves apart from other suppliers. To learn more about our dedication and commitment to customer satisfaction, give us a call. We guarantee product quality and order accuracy. See our Specification Guide for guarantee details. We look forward to partnering with you on your next cabinet job.

Welcome to TaylorCraft Cabinet Door Company
Catalog and Ordering Information

We created our catalog to give you an idea of our selection and to provide design ideas showing how various profiles look when paired together. The styles and materials shown are just a fraction of the design possibilities. Our doors can be customized using a wide variety of standard inside edge, outside edge, applied molding and panel profiles and we can custom match door styles to your specifications. TaylorCraft also offers doors in any readily available wood species from Anigre to Zebra Wood.

Call us or visit taylorcraftdoor.com for a complete list of profile options and more information on our custom capabilities.

We sell our doors in the white, without finish. Doors in our catalog are shown with a clear finish except Mahogany, some of which are shown with a light stain. For detailed ordering instructions, size guidelines, pricing and profiles please request a pricing guide (available to the woodworking trade).

At TaylorCraft Cabinet Door Company we invest in skilled woodcraftsmen and dedicated staff, and we regularly update our facility with state-of-the-art machinery and customized equipment. Our lumber supplier is on site allowing immediate feedback on material quality. Material is run at a minimum feed rate on our molders for quality rather than speed and raised panel doors go through a 10 stage surfacing and sanding process. All doors and drawer fronts are meticulously hand inspected and must pass 11 quality control points before they are approved for delivery.

We understand the importance of reliable shipments and thoughtfully-designed packaging to protect the integrity of product being shipped. Our packaging ensures doors do not contact each other face to face and are well protected in transit. We package doors by job and our shipments are easy to offload, store and unwrap. Our package design minimizes packing waste and time spent unwrapping, and a majority of our package materials are post-consumer recycled products. We partner with dependable carriers and ship nationally and internationally.
